The following is an examiner's statement of reasons for allowance: The claimed invention is deemed unobvious over the cited art of record because such art does not teach or reasonably suggest the overall aspects of an elastic composite comprising a substrate and a first and second elastic members secured to the substrate along a securement path extending longitudinally along the substrate, said first elastic member being secured to the substrate so that the position of said first elastic member on the

substrate varies transversely within said securement path in a first generally periodic wave pattern having at least one period within said securement path in combination with said second elastic member being secured to said substrate so that the position of said second elastic member varies transversely within said said securement path in a second generally periodic wave pattern having at least one period within said securement path in a second generally periodic wave pattern having at least one period within said securement path, said first and second generally periodic wave patterns being shaped such that the elastic composite is more stretchable in the direction of the securement path than in the direction transverse to the securement path .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
